

HYSTER

STRONG PARTNERS.
TOUGH TRUCKS.™

BRING IT.

HYSTER FULL LINE OF TRUCKS

Hyster Company's history is characterized by an unmatched legacy of continuous innovation, superior market responsiveness, and a commitment to build the toughest lift trucks in the world. Hyster® offers a comprehensive range of warehousing equipment, industrial lift trucks, container handlers and reach stackers as well as quality parts to meet your materials handling needs.

Hyster Company offers a complete line of lift trucks with over 130 different models configured for gasoline, LPG, diesel or electric power. Available in the broadest capacity range in the industry—from 2,000 to 105,000 lbs.—each Hyster forklift is designed to meet your standards for dependability and cost of operation.

Consultants and responsive local service are provided through our world-class network of distribution partners. Together, we deliver a complete package of products and solutions to help you improve efficiency, drive down costs and streamline your materials flow.

ELECTRIC COUNTERBALANCED

Hyster® sit-down electric counterbalanced trucks work harder, longer and more cost effectively, which boosts productivity and your bottom line. Ideal for warehouse, retail or industrial applications, these trucks are tough enough to take on even your heaviest loads. With truck capacities ranging from 2,500 pounds to 12,000 pounds, we have all of your needs covered. By employing AC technology, Hyster Company has built-in the ability to customize lift truck performance to individual needs.

SPECIAL features

From the 3-point entry/exit design to the uncluttered floor plate and the tilt steer column, the ergonomically designed compartment plays a big role in improving productivity. A variety of seat options are available to fit most customer needs.

MONOTROL® pedal uses one foot control of acceleration and direction, leaving your hands free for steering and operating hydraulic levers. The Hyster MONOTROL® pedal helps keep your operators more productive.

Adjustable armrest with optional TouchPoint mini-lever electro-hydraulic controls is cushioned and contoured to provide full forearm support. The hydraulic functions, seat-side directional control switch, horn and power disconnect button are all incorporated in the armrest and designed to maximize operator comfort and ease of use.

A25-30XNT

The A25-30XNT series has been designed to maneuver in the tightest of spaces and to move pallets in containers and warehouses, delivering a cost effective solution to meet the requirements of applications where space is at a premium.

E45-70XN

A versatile forklift truck designed for indoor use and ideally suited for a wide variety of applications such as general warehousing, food and beverage distributors, lumber and building material distribution. The E45-70XN series is a great choice for your indoor application needs.

J30-40XNT

The J30-40XNT series three-wheel configuration provides a tighter turning radius for unparalleled maneuverability that makes stacking in limited space and congested loading bays easier than ever. The dual steer wheels provide a smoother, more stable ride.

E30-40HSD₂

These three wheel stand-up lift trucks are primarily intended for use on the dock for loading and unloading trailers, including some stocking and transport use. They are ideal for retail distribution, food manufacturing and processing, general warehousing and manufacturing, storage, plastic products, and freight transportation.

E80-120XN, E100XNS

Our electric E80-120XN series trucks meet the same high-performance standards as our counterbalanced ICE trucks in regards to acceleration, speed control and load-lift abilities. They also offer a lower operating cost, along with zero emissions. Power-assisted braking means improved brake life and reduces operator braking efforts by up to 40 percent.

J45-70XN

The innovative component design and “Drop Battery Box” of this lift truck series allows for the use of pneumatic tires on an electric truck, which provides a Zero Emissions alternative for 4,500-7,000 pound capacity indoor and outdoor applications.

E30-40XN

By utilizing AC motors and transistor controller technology for all traction and hydraulic systems, we’ve reduced the frequency and cost of maintenance. This is one of the hardest working trucks in the business and is ideal for warehouse, retail and industrial applications.

J30-40XN

The J30-40XN four-wheel truck, with its Zero Turning Radius (ZTR) axle offers maneuverability similar to a three-wheel truck, with greater comfort when traveling over longer distances.

J80-100XN

Continuing to bridge the gap between outdoor internal combustion engine (ICE) applications and indoor electric applications, the J80-100XN provides an environmentally friendly option for industries that have historically been ICE applications.

NARROW AISLE

Careful attention to ergonomics and serviceability make Hyster® narrow aisle lift trucks some of the most productive and dependable in their class. If your warehouse incorporates a narrow aisle design, there is a Hyster lift truck to fit your needs. Choose from single or double reach trucks, order pickers or our very narrow aisle (VNA) man-up turret trucks.

N35-40ZRS₂/N30ZDRS₂ N35-45ZR₂/N30-35ZDR₂

The availability of two operator stances—either fore/aft or side stance—as well as the cooler/freezer or SubZero packages, demonstrates versatility in design. The AC reach truck product line offers a wide range of options including fork height display, fork camera, fork laser line, shelf height selector system and a load weight display.

R30XMF₃ *OrderPicker Furniture Mover*

R30XMS₃ *Standard OrderPicker*

R30XM₃ *Counterbalanced Premium OrderPicker*

R30XMA₃ *Straddle Premium OrderPicker*

You'll love our orderpicker's ergonomically superior workstation; a spacious platform with anti-fatigue floor mat, retractable side gates and a multi-function control handle. It's also equipped with other standard operator amenities like a flow-through ventilation wire mesh screen, storage pockets, removable trash bin and a cup holder.

V30-35ZMU

Our AC traction, hoist and steering motors have no brushes to check or replace, resulting in extended service intervals. This, along with features such as superior energy efficiency and continuous vehicle system monitoring, makes the V30-35ZMU very narrow aisle turret trucks cost less to operate and increase your productivity. Five chassis choices, three operator compartment configurations and either a 48- or 72-volt system are all available.

SPECIAL features

Our reach trucks offer the largest operator compartment in the industry and feature a low 9.5" step height and suspended floor plate with thick floor mat to help reduce the stress on your operator's legs for improved productivity. Available in standard forward stance or optional side stance configuration, the ability to assume variable positions within the operator compartment offers a comfortable and natural operating experience.

Double-sealed electrical connections are used throughout the control wire harnesses because they provide a positive mechanical lock, reducing possibilities of loose connections. The IP66 rating provides a waterproof connection and is sealed to prevent contamination.

Hyster® reach trucks offer an optional laser level which provides a laser line at the fork tips to indicate fork position and an optional fork camera which provides a fork eye view of the pallet entry at elevated heights, enhancing retrieval and put away capabilities.

MOTORIZED HAND

Hyster manufactures and markets a wide range of motorized hand lift trucks designed to meet the toughest warehousing and retail needs. Our products include walkie, walkie/riders, reach and straddle stackers. Exceptional maneuverability and industry exclusive options give your operators the power to get more done. Environmental packages including the Cooler/Freezer Package and the Extreme Corrosion/Wash Down Package will stand up to even the harshest conditions.

SPECIAL features

Hyster Intelligent Lift™ on the W45Z^{HD} enables the operator to start transporting the pallet before the unit is at full lift, automatically lifting the pallet to maximum fork height without having to continually hold the lift button.

The Hyster Intelligent Slow Down™ feature on the W45Z^{HD} recognizes when the truck is turning and intelligently reduces the truck's speed, assisting the operator through the corner.

Hyster offers an optional Extreme Corrosion/Wash Down Package* with a galvanized frame, lift linkage, battery well, and fork weldment. Where other lift trucks would rust and require additional cleaning and repainting, the Extreme Corrosion/Wash Down Package helps you keep on trucking. The galvanized frame pallet truck is designed for use in highly corrosive environments like food processing, pickling, tannery, chemical, salt and brine industries.

** Available on select models.*

C60-80Z^{HD}

The C60-80Z^{HD} Center Rider Pallet Truck Series has a welded heavy duty steel plate/bar constructed frame and forks with steel casings for high stress areas that provides superior rigidity and unrivaled durability. An SEM drive motor unit with integral, tapered rolled steer bearing enhances control as you move from staging loads and crossing dock boards to moving in and out of trailers. A 3-position tilt steer column and a 25-inch wide steer handle with full rotary grips that control travel speed and direction provides excellent ergonomics for high speed transporting of goods.

T5-7Z^{AC}

The Hyster[®] T5-7Z^{AC} Tow Tractors provide you the towing capacities to meet your needs. The low profile of the floor mounted, high speed pedal provides easy access to maximum travel speed. The standard cushioned back pad, bulkhead pad and thick anti-fatigue floor mat provide excellent comfort when the operator is in the transport position. A large operator platform with low step-in height affords quick entry/exit onto the truck, especially for those applications where walking through is common.

W45Z^{HD}

Its exceptional maneuverability, ergonomics and performance stems from innovative design and engineering. With a vast array of option combinations and standard features, the W45Z^{HD} ensures that operators are moving loads as quickly and efficiently as possible at every stage of pallet handling.

W40-80Z

Hyster[®] walkie motorized pallet trucks offer exceptional maneuverability due to our ergonomics and performance innovations. Features such as creep speed and fingertip control put the power to be productive in your operators' hands. Optional environmental packages ensure that our trucks will stand up to some of the toughest working conditions.

W25-30ZA₂, W40ZA, W20-30ZR, W25-40ZC

The Hyster Walkie Reach, Straddle and Counterbalanced stacker line of motorized pallet trucks gives big capacity and productivity with the operational cost of a walkie rather than a rider. Superior ergonomics and User Selectable Performance Modes help to increase productivity.

B60Z^{AC}, B60-80Z^{HD}

These units feature optional fork lengths as well as application/environmental packages designed to accommodate your individual requirements, all while delivering advanced productivity, exceptional dependability, and superior serviceability – making the B60Z^{AC} and B60-80Z^{HD} some of the best values available in motorized walkie/rider models.

L02.5

When you want to pick more product faster, without the introduction of more pick zones and travel time, the L02.5 is an ideal solution. The rising operator platform allows for second and third level picking up to 10 feet high. In new and existing facilities this means that more can be stored and moved quicker—in a smaller footprint and with less touches.

L05.0T

Suitable for many types of couplings, the intelligently designed universal flange ensures an ideal solution for a wide range of applications, including automotive assembly and component supply operations, industries operating parts line feed, mail and parcel distribution services, transport and healthcare services and wholesale distribution.

I.C.E. CUSHION

Hyster Company's Internal Combustion Engine Cushion Tire Lift Trucks represent a breakthrough in how lift trucks are designed, built and acquired. Hyster has invested in state-of-the-art manufacturing systems and processes to ensure proven Hyster quality. Buying a Fortis® lift truck means you maximize your purchasing power by buying only the features you need for your application. Using a truck from the Fortis® series means low cost of operations, dependability and owning a lift truck that's still going strong long after the day's work is done.

S30-35FT, S40FTS

A versatile lift truck designed for indoor use, this truck series is ideally suited for a wide variety of applications such as warehousing, food and kindred products, and electronic and electrical equipment.

S80-120FT

This series offers multiple chassis configurations including the Box Car Special (BCS), Paper Roll Special (PRS), and Short Truck Length (FTS). No matter what the application we've got the right lift truck for you.

S50CT

The S50CT retains the legendary toughness, reliability and productivity that you've come to expect from Hyster, reconfiguring it for medium duty applications.

S40-70FT, S55FTS

Designed for indoor use, this truck is suited for many applications such as industrial and commercial machinery, fabricated metal products and motor freight transportation.

S135-155FT

The S135-155FT series has the power to handle your toughest applications, such as primary metals, stone, clay, glass and concrete products, and industrial and commercial machinery.

SPECIAL features

The engine cover, hinged at the rear, offers superior service access to the engine compartment. The tough engine cover is made of a durable, crack-resistant, thermoset polyester resin reinforced with fiberglass.

The patented DuraMatch™ transmission in our Fortis® trucks provides breakthrough features that include the Auto Deceleration System, controlled rollback on ramps, and controlled power reversals to move loads more efficiently with less operator fatigue and product damage.

The Hyster® Fortis® line of lift trucks offers two configurations that employ cowl mounted levers or TouchPoint mini-levers to provide you unsurpassed, low effort, tactile control of all hydraulic functions.

I.C.E. PNEUMATIC

Our Internal Combustion Engine Pneumatic Tire Series of trucks were designed to help you move more in less time. Our engineers combined the toughest engine components with customized performance to create a rugged, durable lift truck that thrives in your challenging applications. Unsurpassed operator comfort means your team can work longer without getting fatigued. And a lower cost of operations equals a healthier bottom line for your company.

H30-35FT, H40FTS

The H30-40FT/S series combines the toughest engine components with customized performance to create a rugged, durable lift truck that thrives in your challenging applications.

H40-70FT

The H40-70FT series lift trucks are built incorporating proven design processes and systems to ensure the toughest, most durable designs.

H50CT

The H50CT retains the legendary toughness, reliability and productivity that you've come to expect from Hyster, reconfiguring it for medium duty applications.

H80-120FT

The full floating design of the drive axle lets the axle housing, not the shafts, carry the weight of the load, enhancing dependability and reliability for a longer service life. Hyster premium self-adjusting brakes provide excellent inching or stopping power.

H135-155FT

The Fortis series choice of high output engines, performance transmissions, hydraulic controls and cooling system options allows you to customize your truck to optimize the productivity in your application.

H170-190FT

The H170-190FT series of lift trucks are designed to be durable, dependable and productive. They are ideally suited for a wide variety of applications such as lumber, steel, concrete and car salvage.

SPECIAL features

The Hyster Stability System reduces truck lean in turns, enhancing lateral stability. Even with the reduced lean, the innovative steer axle mounting design allows for superior travel over uneven surfaces.

Pacesetter VSM™ industrial onboard computer manages all vehicle systems to optimize performance and significantly increase overall reliability and enhance diagnostic capabilities for maximum uptime.

The elastomeric-mounted, Hyster designed, cast ductile iron steer axle with transverse, double-acting hydraulic cylinder, tapered roller spindle support bearings and non-adjustable tie rods provide maximum durability and superior steering control for easy maneuvering and low maintenance.

BIG AND JUMBO

Hyster® Big and Jumbo Trucks make even the heaviest loads and toughest working conditions like material ship yards seem simple. From the Empty Container Handlers to the ReachStacker, you will find a Hyster truck to meet your heavy lifting needs. Hyster Big and Jumbo Trucks are built with the same commitment to reliability, durability and innovation as all other Hyster lift trucks.

SPECIAL features

The ergonomic design of the cab reduces operator fatigue and delivers improved productivity. The ComforCab™II is large and uncluttered, allowing the operator ample room for auxiliary options. Operator compartment features an adjustable suspension seat, with integrated armrest and low effort controls, 4-way adjustable steering wheel, and power-assisted steering and brakes. The cab's structural design creates excellent all-around visibility.

Hyster big trucks feature robust heavy duty masts designed for maximum rigidity. Carefully angled overhead guards provide excellent all-around visibility of the load under high lift conditions.

All Hyster Big and Jumbo trucks are designed to allow easy access to serviceable items and daily checks, drivetrain and hydraulic components in minutes.

H190-360HD₂

The H190-360HD₂ series is engineered for heavy duty applications such as lumber, concrete, produce and general cargo. Each model features durable components with a heavy duty front end that provides excellent visibility through the exclusive VISTA™ mast. The quality, dependability and attention to ergonomics are all designed to increase the productivity of your operators. And with the side tilting ComforCab™II, all engine, transmission and other service check points are conveniently located for quick maintenance. Daily service checks can be completed in less than 10 minutes which equals a lower cost of operation to your organization.

H360HD₂-EC4

The H360HD₂-EC4 is Hyster's empty container handling solution suited for ports and dry dock applications. Featuring a Cummins 6.7L QSB diesel engine, this truck provides empty container stacking capability for 3-high or up to 4-high configurations. Telescoping spreaders with vertical twist locks enable handling of 20 ft.-40 ft. containers for ISO 8 ft. wide containers. Handling solutions are also available for domestic 8' 6" wide containers via our Special Engineering Department. Ease of serviceability is enabled with powered cab tilt and dual gull wing doors providing access to key components in seconds. A well-integrated powertrain featuring proven ZF transmissions provides seamless performance while helping to lower your total cost of ownership.

H360-36/48HD

The H360-36/48HD has been developed, thoroughly tested and refined to provide outstanding performance in pipe handling, general cargo, breakbulk, lumber, steel, concrete and other heavy duty industries and applications. It features durable components built around an efficient powertrain, an all-new heavy duty front end, and excellent all-around visibility based on the same core values of the Hyster® Brand. The truck is engineered for easy service while offering up to 20% lower fuel consumption than other leading competitive products. The mast channel rigidity is increased over 30% compared to the H300-360HD₂ series. Two models are available: the H360-36HD with 36,000 lbs. of lifting capacity at 36-inch load center and the H360-48HD with 36,000 lbs. of lifting capacity at 48-inch load center. Both trucks are engineered to provide up to 40,000 lbs. of lifting capacity at shorter load centers.

BIG AND JUMBO

H400-450HD/S

This series is Hyster's heavy duty offering for high capacity loaded applications including steel, breakbulk, concrete and pipe handling. Designed as a compact, yet heavy duty solution to your handling applications, counterweights are optimized for capable lifting under all loaded conditions. All models feature a Cummins QSB 6.7L engine providing up to 230 peak horsepower, as well as on-demand hydraulics with variable displacement pump technology, engaging the pumps only when required. This decreases your cost of operation while boosting productivity for your operation.

H550-700HD/S

This series is a rugged line of heavy duty trucks for extreme duty applications in steel, breakbulk, concrete, pipe handling and general cargo—anywhere extreme duty cycles and heavy loads are common. All models feature a Cummins QSB 6.7L engine with cooled exhaust gas recirculation (EGR) and robust powertrain controls enabling ECO-mode selectable performance levels. The H550-700HD/S trucks can be customized with a number of optional attachments required to pick up, grab or lift loads in multiple industry segments including tire handlers, coil rams, pipe handlers and produce handlers.

H400-500HD-EC, H450HDS-EC

The H400-500HD-EC series, equipped with proven Cummins QSB 6.7L engines, offers four models with capacities for laden containers from 40,000 lbs. through 50,000 lbs., providing 5-high or up to 6-high stacking capability. Hydraulically adjustable spreader heads enable handling of 9' 6" wide containers as well as 8' and 8' 6" wide containers. Powered pile sloping for loading and unloading on ramps allows operation under various stacking requirements using a number of mast options. The ergonomically advanced ComforCab™II provides intuitive operator controls and enhanced operator comfort with features like automatic throttle up and outstanding all-around visibility through the angled overhead guards.

H800-1050HD, H1050HDS

Designed for high capacity handling of loads in breakbulk, steel, and general cargo operations in a variety of industries. A short wheelbase option enables the lifting of loads up to 105,000 lbs. on a smaller footprint than available from the competition. Due to various mast and carriage options, the lifting capacities are among the highest in the industry. All models feature a Cummins QSL 9 engine with cooled EGR and a water-cooled variable geometry turbocharger that provides ample power for the the heaviest of lifting applications. A Dana Spicer TE-32 transmission is also standard on all models.

H1050-1150HD-CH

This front mounted cab high capacity container handler is designed for handling the most extreme load conditions. Hyster's flag ship of masted top pick solutions provides up to 88,000 lbs. of laden container handling 3, 4, 5 or 6-high in ports and intermodal applications. Integrated spreaders enable handling of both 20' and 40' ISO and domestic containers. All models feature a Cummins QSL 9 engine with cooled EGR and a water-cooled variable geometry turbocharger. Innovative powertrain controls enable ECO-mode selectable performance levels for the optimum blend of high performance and high fuel economy.

RS45-46 REACHSTACKER

The RS45-46 ReachStacker series is Hyster's solution for multi-row laden 9' 6" or 8' 6" container handling with up to 5-high in the first row, 4-high in the second row, and up to 3-high in the third row. Providing versatility in stacking and depth configurations for laden containers, the ReachStacker turns circles around the competition. Integrated spreaders handle both 20' and 40' ISO and domestic containers. Powered damping and pile sloping help to load and unload on ramps under various stacking requirements. Powered cab sliding offers optimal visibility at various heights, and the industry competitive ergonomic cab design enables wide sweeping views of the container at every stage of the handling operation.

THE HYSTER ADVANTAGE

HYSTER® i³ TECHNOLOGY™

Hyster i³ Technology™ integrates commonality among Hyster warehouse products and simplifies the way in which operators and technicians alike handle and service the truck. The Integrated Intelligent Interface ties together functionality, software, diagnostic codes, similar interfaces and is Hyster Tracker compatible. This technology allows operator input to optimize performance to suit operator skill level. It also provides setup and diagnostic menus for service technicians.

i³ TECHNOLOGY

SUPPORTING CUSTOMERS WITH WORLD-CLASS PARTS & SERVICE

Four Parts Distribution Centers strategically located around the world provide a full range of original equipment and aftermarket parts that help maintain our customers' uptime. G.A.P., our Guaranteed Availability Program, guarantees that if a covered part is not available the next business day it will be provided to you FREE of charge.*

We also take that commitment into the field with the Hyster CERTECH® Certification training program. This technical training program provides both systems level as well as product-specific education to ensure lift trucks are repaired right the first time.

* Contact your local dealer for program details.

HYSTER TRACKER - WIRELESS ASSET MANAGEMENT

Take your fleet operation to the next level with wireless asset management from Hyster. Hyster Tracker provides a scalable solution for fleets. From monitoring truck utilization to limiting operator access, Hyster Tracker allows you to track your fleet at your fingertips.

TRACKER

INNOVATIVE TRUCKS ENGINEERED TO MEET THE MOST DEMANDING APPLICATIONS

For more than 80 years, Hyster has been conquering the world's most demanding applications. In the 1920's Hyster started as a manufacturer of lifting machines used in the rigorous logging industry of the United States' Pacific Northwest. A few years later the first forklift trucks were invented and the Hyster® brand quickly gained its reputation for rugged quality. Hyster® lift trucks are designed to lower your cost of operations. Every truck we make — gasoline, LPG, diesel and electric — is purpose-built to excel in its application. Every truck is also backed by an unmatched network of specialists.

Dealer Network — Through our Dealer Network, we can offer the expertise of fleet managers, parts suppliers, capital procurement specialists and trainers. Hyster's carefully chosen dealers — and the people they employ — fully understand customer applications, assist in selecting the right lift truck and provide fast, reliable support after the sale.

Hyster Fleet Services — Even if you operate other brands, we can manage your maintenance and replacement plan. We can offer complete fleet analysis, fleet history summary and a cost-effective proposal for replacement and scheduled maintenance.

Parts — With genuine Hyster replacement parts and UNISOURCE™ parts for all makes of lift trucks, we are your one-stop source for lift truck parts. In fact, we offer more than 2 million part number crosses for most brands of materials handling and other in-plant mobile equipment.

Rental Products — When leasing or buying isn't a practical option, we have access to more than 14,000 units for short- and long-term rental. We'll help you maintain output in a cost-effective manner.

Hyster Capital — We can arrange solutions for special financing requirements, taking the difficulties out of buying the equipment you need. Whether you purchase or lease a new or used lift truck, Hyster Capital offers superior service and competitive rates.

Special Products Engineering Department (SPED) — Different materials require different handling. That's why we can work with you to customize your lift trucks. From strobe lights to specially made forks, SPED has the tools to help you get the job done right.

Operator Training — Proper education in operating lift trucks minimizes the risk of injuries due to accidents while increasing productivity. Hyster offers OSHA-compliant materials that support the training of qualified operators.

Service — Your local Hyster dealer offers a flexible, customized and comprehensive maintenance plan based on each lift truck's application, make, model and operation environment. Hyster service programs offer scheduled inspections and maintenance, and when you need immediate service on a fleet or single truck, your local dealer offers quick, responsive service dispatched to your location.
