The Only Source You'll Need for Equipment Parts and Accessories

Quality

We have millions of parts available in our proprietary database. Our inventory consists of parts for common manufacturers like Hyster, Yale, Bendi, Drexel, Landoll, Combilift, Taylor-Dunn, Manitou, and many more.

Availability

Whether you need a genuine manufacturer part or an aftermarket alternative, we have what you need, guaranteed. And no matter what you need, we'll get it to you fast.

Price

Providing our customers with the right price and the lowest cost of ownership is important to us.

Fast and Easy Tire Services to Keep Your Fleet Performing at Its Best

- Large fleet of state-of-the-art press trucks for efficient mobile tire service
- Professional on-site fleet inspections and tire analysis by industrial tire specialists
- Seasoned industry experts with over 100 years of knowledge and experience
- Top quality products at highly competitive prices with support from worldwide suppliers
- Multiple locations throughout the Midwest and Northeast to better serve you

Safety is our Workstyle

Our fully trained professional instructors have trained thousands of operators and trainers on all types of lift trucks. We will put together a cost-effective training program tailored to your specific lifts that will help your operators work safely and meet your compliance obligations either in person or online. Forklift training from Alta Material Handling will provide you with:

The highest quality lift truck operator safety training resulting in:

- Increased productivity
- Reduced insurance premiums
- Lower insurance costs

Train-the-trainer programs will teach senior operators:

- To understand the content they teach
- How to teach
- How to document everything to ensure maximum employee benefit and adherence to OSHA and ANSI standards

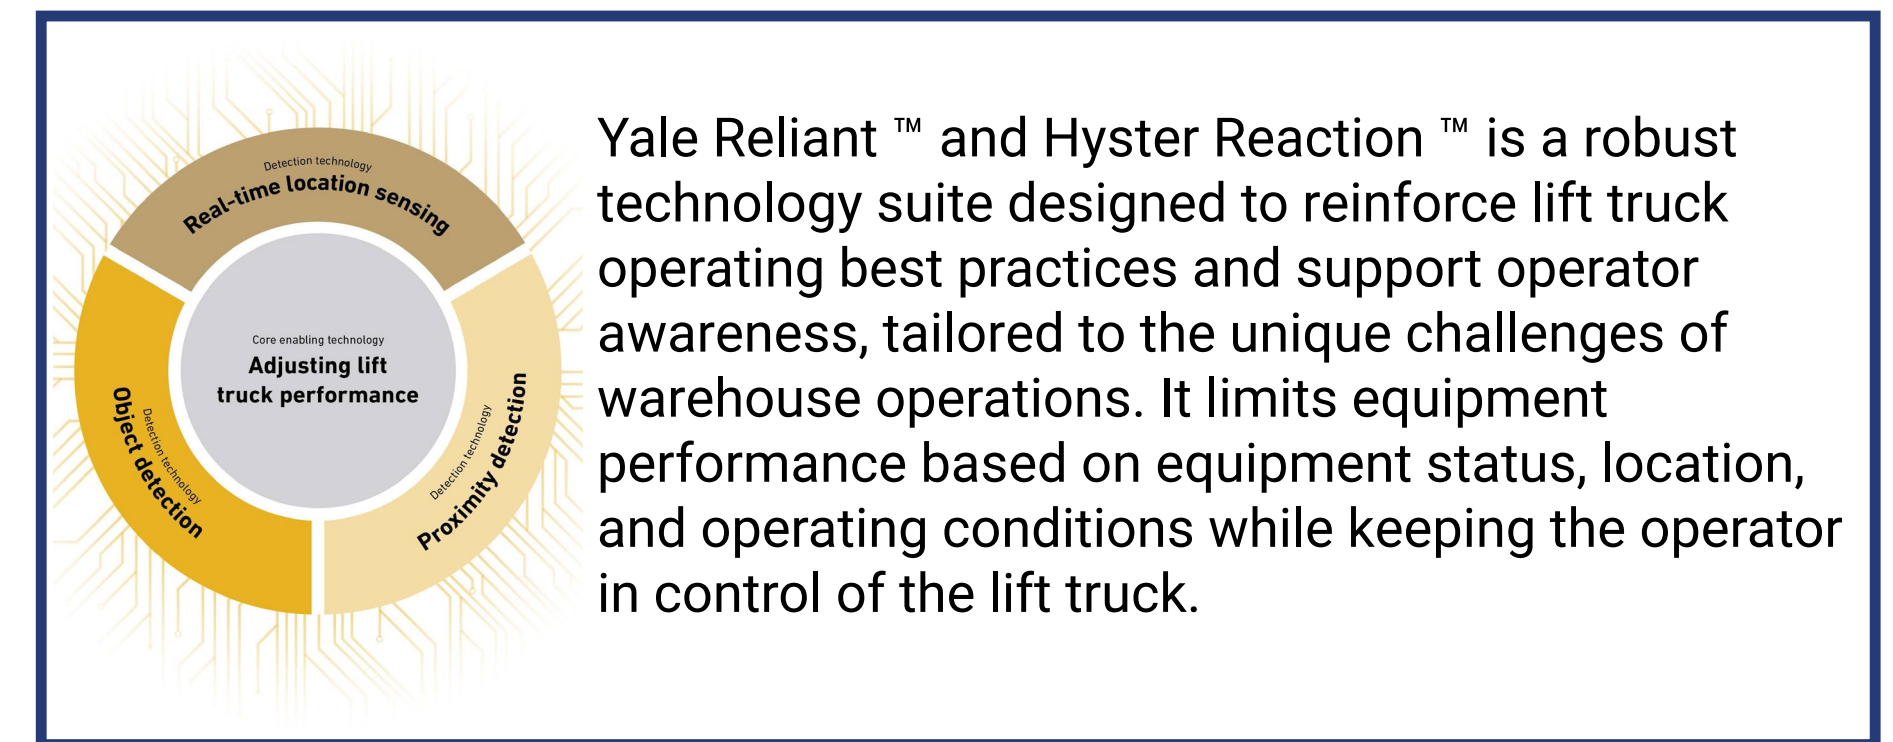

Aerial Lift safety training will teach your employees:

- How to inspect their lifts for safety including emergency controls
- How to identify workplace hazards that could cause injury
- Fall protection requirements

Powerful Tool For Operator Awareness

Proximity detection

Tracks proximity to other equipment, pedestrians and beacons through local or real-time location technologies, helping inform performance controls.

Real-time location sensing

Monitors where equipment is and sets exclusion zones to limit speed or restrict trucks from designated areas altogether.

Object detection

Detects objects in the path of travel through LiDAR technology, including those not connected to proximity tags, helping inform performance controls.

Telemetry

Real-time telemetry lift truck data provides a thorough look into your fleet's day-to-day operations so your team can work smarter.

UTILIZATION PROFICIENCY

Optimize workflow and help boost productivity by analyzing the efficiencies of your operators and equipment.

EQUIPMENT DIAGNOSTICS

Monitor engine, transmission, hydraulic and electronic functions to help provide maximum uptime.

SAFETY TOOLS & EMAIL ALERTS

Proactive monitoring systems will send notifications in real-time to address events in an effective manner with instant follow-up.

GPS LOCATION

Gain full visibility into the location of your fleet and operators, activity at your site, and where truck impacts are occurring at your facility.

IMPACT DETECTION

Help improve site safety measures and aid in reducing avoidable damage through accurate impact monitoring and real-time alerts.

LIVE UTILIZATION

Real-time access to your fleet's status including utilization, availability, charging or maintenance; providing insights to help right-size your fleet.

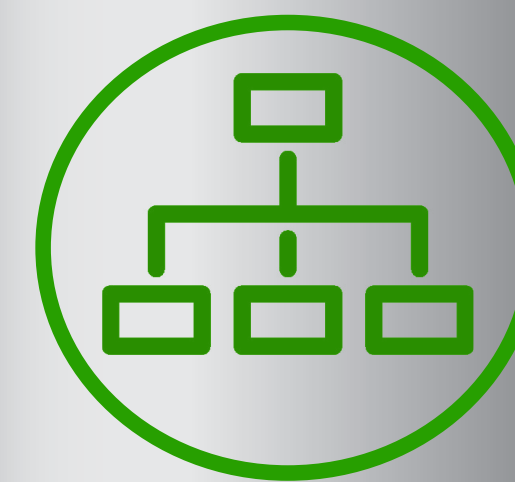

Access Online

Quality parts to keep you moving

Multi-Cart Checkout

Save time by reviewing and approving purchases across multiple shopping carts and locations at one time.

Searchable Inventory

Search and shop parts by truck model, serial number, category, or keyword.

Parts Diagrams

Reference and validate the parts you need with the parts diagram viewer and when you are ready, you may add the part to your cart for purchase or route it for review, as needed.
